

International Electron Beam Welding Conference

Lectures of the 2nd IEBW Conference
taking place in Aachen on March 26 – 30, 2012

Organized by
American Welding Society (AWS), Miami
International Institute of Welding (IIW), Villepinte
German Welding Society (DVS), Düsseldorf

Table of contents

Preface

Applications/Efficiency 1

T. Löwer, Munich/D

Energy supply today and in future: what is the contribution of the electron beam technology? . 1

W. Behr, J. Remmel and T. Koppitz, Jülich/D

Electron beam welding – a key technology in the scientific apparatus engineering 4

U. Clauß, Neukirchen/D

Industrial electron beam applications 10

Applications/Efficiency 2

C. S. Punshon and A. Sanderson, Cambridge/GB

Development of local vacuum, mobile seal technology for the application of electron beam welding to massive structures 14

J. F. Rugh and G. R. LaFlamme, Enfield/USA

The use of electron beam welding in turbomachinery manufacturing 22

G. Ripper, Maisach/D

Electron beam welding – actual applications in the aerospace industry 27

Applications/Efficiency 3

K.-R. Schulze, Neuberg/D

EB welding of turbocharger rotors – many aspects, many concepts 29

N. Murray, R. Konya, A. Beniyash, Fr.-W. Bach and T. Hassel, Garbsen/D

New advances in non-vacuum electron beam cutting 35

M. Merkel, Hünstetten/D, G. Mattausch and B. Graffel, Dresden/D

Micro welding and micro surface treatment with the electron beam: opportunities and challenges 40

Th. Krüssel, Burg/D, and H. Orlick, Halle (Saale)/D

Skilled person for electron beam welding – a basic course for operators, work planer and engineers according to Guideline DVS 1199 46

Surface Treatment

M. Klemm, R. Zenker, Freiberg/D, I. Haase, R. Franke, Dresden/D, A. Rose and A. von Hehl, Bremen/D Surface engineering of aluminium alloys using the options of innovative electron beam deflection techniques	48
X. Wang, Wuhan/CN and Beijing/CN, E. Guo, S. Gong and H. Zhao, Beijing/CN Study of electron beam surf-sculpt technology based on control of magnetic field	54
A. L. Buxton, Cambridge/GB, R. Oluleke and P. Prangnell, Manchester/GB Generating and assessing the quality and functionality of EB structured surfaces for dissimilar material joints	58
T. Yoshikawa, Y. Noguchi, Amagasaki/J, K. Uehara, Tottory/J, and T. Monodane, Tokyo/J Surface treatment technology and its applications using electron beam	63

Materials 1

U. Reisgen, S. Olschok and A. Backhaus, Aachen/D Electron beam welding and brazing of gamma-titanium aluminide for linear and circumferential joints	68
P. Fu, Z. Mao, W. Yu, S. Gong and Z. Tang, Beijing/CN Microstructure and properties of simultaneous EBW and heat treatment with multi-pools for near α titanium alloy	72
C. Börner, H. Pries and K. Dilger, Braunschweig/D Use of the multiple-focus technology for an influence on weld seam geometry and hot cracking of nickel-based super alloys	77

Materials 2

K. Rüttrich and R. Zenker, Freiberg/D Characteristics and prospects of process integrated thermal field heat treatment for electron beam welding of cast iron	83
S. Krasnorutskyi, M. Zinke, D. Keil, Magdeburg/D, H. Pries and Th. Krüssel, Braunschweig/D Development of multiple-beam techniques for electron beam welding of thick-walled components of duplex stainless steels without filler material	88
R. Konya, Garbsen/D, M. Collmann, P. Schaumann, Hannover/D, S. Priebe, Leipzig/D, T. A. Deißer, Witten/D, A. Beniyash, N. Murray, Fr.-W. Bach and T. Hassel, Garbsen/D High-strength steels joined using non-vacuum electron beam welding of tubular steel towers for wind turbines	94

Innovations in EBW

R. Becker, Gelnhausen/D, and M. Mücke, Maisach/D

Automatic generation of EGUN input files to provide enhanced mesh resolution for the numerical simulation of welding guns with small cathodes 100

M. Mücke, C. Scheiblich and J. Bröcker, Maisach/D

Fast beam deflection – a contribution to quality enhancement in electron beam welding 103

C. Otten, U. Reisgen, S. Olschok, H. Fischer and C. Panfil, Aachen/D

Electron beam structuring of titanium materials for medical applications: potential for improved bone ingrowth behaviour 106

Diagnostics

J. W. Elmer, Livermore/USA, T. A. Palmer, State College/USA, and A. T. Teruya, Livermore/USA

An overview of the Enhanced Modified Faraday Cup (EMFC) electron beam power density distribution diagnostic 108

P. Petrov, Sofia/BG

Techniques for on-line monitoring and inspection of electron beam welding process 114

U. Reisgen, S. Olschok, J. deVries, A. Backhaus, S. Ufer, S. Tiedke, T. Schmitz-Kempen, B. Reichenberg and E. Drichel, Aachen/D

Accurate diagnostic of electron beam characteristics 117

Weld Properties 1

U. Reisgen, S. Olschok and S. Jakobs, Aachen/D

A comparison of electron beam welding with laser beam welding in vacuum 119

U. Reisgen, S. Olschok, A. Backhaus, Aachen/D, M. Rethmeier, A. Gumenyuk and F. Tölle, Berlin/D

Reduction of weld residual stresses with the electron beam 128

W. Yu, X. Wang, Z. Mao and P. Han, Beijing/CN

Study on microstructure and mechanical properties of EBW joints of titanium alloy with large thickness 133

U. Reisgen, S. Olschok and S. Ufer, Aachen/D

Qualification and optimisation of out-of-position joining with the electron beam 137

Weld Properties 2

U. Reisgen, S. Olschok, S. Ufer, W. Bleck, S. Münstermann and G. Golisch, Aachen/D

Qualification of electron beam welding in the thick-plate range for applications in wind energy plant construction 142

Rapid Prototyping/Manufacturing

C. N. Ribton, Cambridge/GB

High productivity electron beam additive manufacturing 148

A. Richter, Th. Krüssel and C. Just, Burg/D

Deposition welding with the electron beam as repair technology 152

List of authors and co-authors 157
