

Table of contents

Preface

Opening Presentation

K. Middeldorf, Düsseldorf/D

Trends in joining technology – Production, value added and employment by joining 1

Materials

A. Carlsson and A. Oskarsson, Finspång/S

New clad fin material with high post braze strength and excellent sagging resistance 15

G. Hanko, C. Henkel and A. Hajek, Ranshofen/A

Material requirements for heat exchanger applications 24

P. Wöstmann and H. Kiesevalter, Bielefeld/D

Industrial coating application from MPE tubes 30

H. Janssen, V. Saß, Bonn/D, R. Sicking, Grevenbroich/D, and M. Mrotzek, Hamburg/D

Hydro aluminium – new multiclاد materials 35

Applications

B. Ward and D. Warrington, Leeds/GB

Brazing of aluminium to stainless steel by various methods 46

Equipment

P. Proházka, Rožnov p. R./CZ

Flame brazing machinery – a transition from Themis, a.s. to PP-tech, s.r.o. completed 50

A. Bielewicz and P. Skarbiński, Świebodzin/PL

Low volume CAB furnaces by SECO/WARWICK 56

Process and Quality Control

J. Garcia Zaldivar, LaVerrière/F

Exhaust gas condensates corrosion test on low pressure cooling system of aluminum brazed EGR, WCAC and ACAC 65

A. Tasche, Pansdorf/D

Sustainable influence on process capability and overall equipment effectiveness 76

P. Englert, Stuttgart/D

Blackbraz® – an innovative surface nano-technology in the CAB-process 90

D. K. Hawksworth, Oakville/CDN, R. G. J. Westergård, Finspång/S, and A. J. W. Ogilvy, Neath/GB

Trillium technology – aluminium brazing with a composite liner 99

L. Orman and H.-W. Swidersky, Hannover/D

Selective pre-fluxing with adhesives: fashion or progress – Paint fluxing: pros and cons 105

M. Melander, Finspång/S, and R. Woods, Pleasanton/USA

A compilation of corrosion studies of brazed aluminium heat exchangers after field service.. 115

M. Türpe, Stuttgart/D, J. Janczak-Rusch, Dübendorf/CH, B. Grünenwald, Stuttgart/D, and V. Bissig, Cham/CH

Approach for Al brazing with nano filler metals 125

U. Füssel, E. Hofmann, J. Zähr, Dresden/D, M. Türpe and B. Grünenwald, Stuttgart/D

Correlation between atmospheric conditions and brazeability of aluminium using different surface activation methods 130

Testing

S. S. Lievens, Zwijnaarde/B, and P. García-Juan, Bad Hönningen/D

Investigation of the interaction between aluminum materials brazed with non-corrosive flux and coolant additive technologies 138

T. Feldhege, K. Müller and S. Wörner, Filderstadt/D

Exhaust condensate – corrosivity of selected constituents on brazed aluminum 153

L. Peguet, M. Saint-Genis, M. Perrier, E. Perrin, A. Afseth and H. Ribes, Voreppe cedex/F

A study of OY water test dedicated to internal corrosion of automotive heat exchangers using electro-chemical and statistical tools 163

List of authors and co-authors 173
