

**Thermal Spray Solutions**  
Advances in Technology and Application

**Osaka, Japan**  
**May 10 – 12 , 2004**

**Coating technologies for vehicle engines**

Development of ferrous powder thermal spray coatings on cylinder bore in diesel engine.....	01
High performance coatings produced by internal plasma spraying on engine blocks of new generation .....	01
Cast iron coatings containing graphite structure by atmospheric plasma spraying.....	01
A materials system and method of its application for the wear protection of aluminium engine cylinder bore surfaces.....	01

**Applications ( I )**

Coatings and its applications the properties of the high productive high velocity arc sprayed .....	02
HVOF sprayed Cr <sub>3</sub> C <sub>2</sub> -NiCr cermet coating to improve the erosion resisting performance of the coal burning boiler tube.....	02
Transition of a world class HVOF thermal spray capability into a US engine overhaul facility .....	02

**Applications ( II )**

Thermally sprayed filler metal coatings for high temperature brazing.....	02
Manufacturing diamond impregnated tools for stone machining through thermal spraying .....	03
Optimization of the repair thermal spray coatings for the damaged singlecrystal superalloy.....	03
Post-spray treatment of plasma sprayed yttria stabilized zirconia (YSZ) electrolyte with spark plasma sintering (SPS) technique.....	03
Mechanical properties of ceramic matrix composite for high temperature applications obtained by plasma spraying.....	03

**Thermal barrier coatings ( II )**

Effect of interface roughness on internal stress of ceramic thermal barrier coating.....	04
Delamination crack growth in thermal barrier coatings .....	04
Performance of thermal barrier coatings formed by gas tunnel type plasma spraying.....	04
Intrinsic properties of thermal sprayed single splats on substrates.....	04
Thick thermal barrier coatings with controlled microstructures using solution precursor plasma spray process.....	05
The effect of YSZ microstructure on young's modulus .....	05

**Innovative equipment and process technology ( II )**

Thin plasma-transferred-arc welded coatings – an alternative to thermally sprayed coatings? .....	05
Chemical composition optimisation of perovskite coatings by suspension plasma spraying for SOFC cathodes.....	05
Denser ceramic coatings obtained by the optimization of the suspension plasma spraying technique .....	06
Design of a nozzle extension for thermal spray under very low pressure conditions.....	06
A study of plasma gun orientation control accuracy for the thermal spraying robot.....	06

**HVOF-processes and materials ( II )**

Solid particle erosion resistance of thermally sprayed functionally graded polymer/ceramic coatings.....	06
Optimization of wear protective coatings for heat transferring components.....	07
In-process exothermic reaction in HVOF and plasma spraying with SiO <sub>2</sub> /Ni/Al-Si-Mg composite powder.....	07
Phase structure-mechanical property relationships in HVOF-sprayed WC-12Co coatings.....	07
A study of gas and particle flow characteristics in HVOF thermal spraying process.....	07
Effect of feedstock powder size on the sliding wear behaviour of thermal sprayed HVOF Cr <sub>3</sub> C <sub>2</sub> -NiCr coatings.....	07

**Applications ( IV )**

The on-site manufacturing of thermally sprayed coatings.....	08
Development of plasma sprayed corrosion protection coatings for sodium sulfur battery cell containers.....	08
Thick aluminum coatings using axial plasma spray for proton beam collimators .....	08
Fatigue resistance characteristics of thermal sprayed CFRP (Carbon Fiber Reinforced Plastics) rollers.....	08
Induction plasma spraying of samaria doped ceria as electrolyte for solid oxide fuel cells.....	09

**Coating technologies for vehicle engines**

Development of ferrous powder thermal spray coatings on cylinder bore in diesel engine..... 01  
 High performance coatings produced by internal plasma spraying on engine blocks of new generation ..... 01  
 Cast iron coatings containing graphite structure by atmospheric plasma spraying ..... 01  
 A materials system and method of its application for the wear protection of aluminium engine cylinder bore surfaces..... 01

**Applications ( I )**

Coatings and its applications the properties of the high productive high velocity arc sprayed ..... 02  
 HVOF sprayed Cr<sub>3</sub>C<sub>2</sub>-NiCr cermet coating to improve the erosion resisting performance of the coal burning boiler tube..... 02  
 Transition of a world class HVOF thermal spray capability into a US engine overhaul facility ..... 02

**Applications ( II )**

Thermally sprayed filler metal coatings for high temperature brazing ..... 02  
 Manufacturing diamond impregnated tools for stone machining through thermal spraying ..... 03  
 Optimization of the repair thermal spray coatings for the damaged singlecrystal superalloy ..... 03  
 Post-spray treatment of plasma sprayed yttria stabilized zirconia (YSZ) electrolyte with spark plasma sintering (SPS) technique..... 03  
 Mechanical properties of ceramic matrix composite for high temperature applications obtained by plasma spraying ..... 03

**Thermal barrier coatings ( II )**

Effect of interface roughness on internal stress of ceramic thermal barrier coating ..... 04  
 Delamination crack growth in thermal barrier coatings ..... 04  
 Performance of thermal barrier coatings formed by gas tunnel type plasma spraying ..... 04  
 Intrinsic properties of thermal sprayed single splats on substrates ..... 04  
 Thick thermal barrier coatings with controlled microstructures using solution precursor plasma spray process ..... 05  
 The effect of YSZ microstructure on young's modulus ..... 05

**Innovative equipment and process technology ( II )**

Thin plasma-transferred-arc welded coatings – an alternative to thermally sprayed coatings? ..... 05  
 Chemical composition optimisation of perovskite coatings by suspension plasma spraying for SOFC cathodes..... 05  
 Denser ceramic coatings obtained by the optimization of the suspension plasma spraying technique ..... 06  
 Design of a nozzle extension for thermal spray under very low pressure conditions ..... 06  
 A study of plasma gun orientation control accuracy for the thermal spraying robot ..... 06

**HVOF-processes and materials ( II )**

Solid particle erosion resistance of thermally sprayed functionally graded polymer/ceramic coatings..... 06  
 Optimization of wear protective coatings for heat transferring components..... 07  
 In-process exothermic reaction in HVOF and plasma spraying with SiO<sub>2</sub>/Ni/Al-Si-Mg composite powder..... 07  
 Phase structure-mechanical property relationships in HVOF-sprayed WC-12Co coatings..... 07  
 A study of gas and particle flow characteristics in HVOF thermal spraying process..... 07  
 Effect of feedstock powder size on the sliding wear behaviour of thermal sprayed HVOF Cr<sub>3</sub>C<sub>2</sub>-NiCr coatings..... 07

**Applications ( IV )**

The on-site manufacturing of thermally sprayed coatings..... 08  
 Development of plasma sprayed corrosion protection coatings for sodium sulfur battery cell containers..... 08  
 Thick aluminum coatings using axial plasma spray for proton beam collimators ..... 08  
 Fatigue resistance characteristics of thermal sprayed CFRP (Carbon Fiber Reinforced Plastics) rollers..... 08  
 Induction plasma spraying of samaria doped ceria as electrolyte for solid oxide fuel cells ..... 09

## **Innovative equipment and process technology ( IV )**

Ceramic spraying using electromagnetically accelerated plasma .....	09
Arc spraying with dynamic current generators .....	09
Microstructure and properties of molybdenum coatings deposited by microplasma spraying torch with a novel hollow cathode .....	10
Interactions between molten metal splats landing on a substrate during coating formation .....	10
Durability of the zirconia based coatings in contact with manganese oxide at 1273 K .....	10
High powered axial injection plasma torch for internal surfaces .....	10

### **Applications ( V )**

Thermal spray technology growth in gas turbine coatings .....	10
Research on microstructure and properties of coating produced by high velocity electric wire arc spraying of $TiB_2/Al_2O_3$ cored wire .....	11
Residual stress analysis in plasma sprayed free-standing zirconia components .....	11
Latest case study and subject of thermal spray technology in Japan .....	11

### **Cold spray ( III )**

Nanostructured aluminum coatings produced using cold spraying technology .....	11
Deposition of copper by cold gas dynamic spraying: an investigation of dependence of microstructure and properties of the deposits on the spraying conditions .....	11
Influence of substrate conditions and traverse speed on cold sprayed coatings .....	12
A fundamental study of the kinetic spray process .....	12
Characterization of microstructure of nanostructured Fe-Si coating deposited by cold spraying C.-J. Li, W.-Y. Li, W.-H. Ma and H. Fukunuma .....	12
Use of a twin powder feeder with the cold gas dynamic spray process .....	12

### **Applications ( VI )**

The microstructure behavior of thermal sprayed $TiO_2$ coating on the bio-degradable plastic .....	13
Sealing of thermally sprayed HVOF coatings for boiler applications .....	13
Present furnace and pot roll coatings and future development .....	13
Elaboration of SOFCs' electrolytes by air plasma spraying (APS) and vacuum plasma spraying (VPS)-comparison of electrolytes' properties .....	13

## **Innovative equipment and process technology ( I )**

Finely structured ceramic coatings elaborated by liquid suspension injection in a DC plasma jet .....	14
Alumina coatings formed by electromagnetically accelerated plasma spraying .....	14
Study on the properties of WC-NiCr and $Cr_3C_2$ -NiCr cermet coating using the continuous detonation spray method .....	14
Deposition of carbides by activated combustion HVOF spraying .....	14

### **Thermal barrier coatings ( I )**

Effect of micro pores on deformation behavior of plasma-sprayed thermal barrier coatings .....	15
Thermomechanical behaviour of bimodal structured thermal barrier coatings .....	15
Properties of HVOF sprayed multi-scale polymer/silica nanocomposite coatings .....	15
Improvement of bond strength of thermal barrier coatings by a laser remelting process .....	15

### **Cold spray ( I )**

Equipment engineering and process control for cold spraying .....	15
Formation of $TiO_2$ photocatalyst through cold spraying .....	16

### **HVOF-processes and materials ( I )**

HVOF ceramic coatings .....	16
Tribological behavior of HVOF-sprayed $Cr_3C_2$ -NiCr and TiC-based coatings under high-temperature dry sliding conditions .....	16

Oxidation behaviour of molybdenum disilicide coatings at 1500 °C.....	16
Restricted oxidation of HVOF sprayed deposits by composition control of combustion gas .....	17
Wear behavior of HVOF sprayed WC-12%Co coatings vs. hard chrome plating.....	17
Influence of substrate properties on the impact resistance of WC cermet coatings.....	17
<b>Applications ( III )</b>	
The current situation and future of thermal spraying industry in China .....	17
Development of thermally sprayed coating applied for boiler tube.....	17
DC and RF plasma processing for fabrication of solid oxide fuel cells.....	18
Full profile fitting of radio frequency suspension plasma sprayed ultra-fine hydroxyapatite powders .....	18
Low pressure plasma spraying (LPPS) as a tool for the deposition of functional SOFC component.....	18
<b>Cold spray ( II )</b>	
Study of aluminum bronze coating by cold spray process .....	18
Characterization of cold-sprayed nickel-base coatings.....	18
A study of adhesive strength of cold spray coatings .....	19
Impact fusion phenomenon during cold spraying of zinc .....	19
Microstructural and electrochemical characterization of cold-sprayed 1100 aluminum coating.....	19
<b>Innovative equipment and process technology ( III )</b>	
Low porosity and fine coatings produced by a new type nozzle of high velocity arc spray gun .....	19
Optimisation of energy management through Plasma-Augmented-Laser-Cladding (PALC) .....	20
Development of high quality thermal sprayed metal coating process by shielding control.....	20
Improved nozzle design of de-laval-type nozzles for the atmospheric plasma spraying .....	20
Fabrication of aluminum nitride coating by reactive RF plasma spray process.....	20
<b>Innovative equipment and process technology ( V )</b>	
Splat formation in wire arc spraying .....	21
Investigation of AISi coatings prepared by laser-assisted atmospheric plasma spraying of internal surfaces of tubes.....	21
Microplasma wire spraying .....	21
Modulation plasma technology .....	21
TiC based coatings prepared by combining SHS and plasma spraying .....	21
Experimental study on wire explosion directional spraying.....	22
<b>Characterization methods for coating properties ( V )</b>	
Effect of substrate surface change by heating on transition in flattening behavior of thermal sprayed particles.....	22
On the effects of processing parameters on pore network architecture and characteristics of Al <sub>2</sub> O <sub>3</sub> -13% wt. TiO <sub>2</sub> : experimental quantification and prediction by artificial intelligence .....	22
The relation between hardness of substrate and WC-Co coating destruction by HVOF.....	23
Study on the behavior of arc-spraying coatings with high-temperature erosion resistance .....	23
<b>Innovative equipment and process technology ( VI )</b>	
Some trials to improve uniformity of film thickness by manual thermal spraying .....	23
Plasma reaction synthesis of agglomerated oxide powders by axial injection torch .....	23
Dense oxide coating deposition by high velocity TPCVD utilizing boiling of metal alcoxide.....	23
Controlled atmosphere reaction plasma synthesis of multicomponent ceramic powders .....	24
Deposition rate increase in APS processes by means of multiple injection ports .....	24
HVAF arc spraying.....	24
<b>Protective coatings against wear and erosion ( II )</b>	
Abrasion behavior of nanostructured and conventional titania coatings thermally sprayed via APS, VPS and HVOF .....	24
Abrasion and erosion behavior of WC and CrC cermet coatings.....	24

Surface changes in thermally sprayed hard coatings by wear of different abrasives.....	25
The microstructure and high temperature sliding wear behavior of Fe-Al coating produced by high velocity arc spraying.....	25
The microstructure and tribology behavior of NiTiZrSiSn bulk amorphous HVOF coating.....	25
<b>Characterization methods for coating properties ( I )</b>	
Evaluation of adhesive strength of HVOF sprayed metallic alloy coatings by a modified tensile test .....	25
Comprehensive study of the process – property correlations: case study for molybdenum coatings .....	26
Effects of cryomilling on the oxidation of thermally sprayed MCrAlY .....	26
Production of rapidly solidified iron matrix composite deposits with dispersed boride particles by plasma spraying .....	26
Mechanical properties, microstructural characteristics and in-vitro behavior of APS-sprayed nanostructured and conventional hydroxyapatite coatings .....	27
<b>Photocatalytic materials</b>	
The photoresponse and donor concentration of plasma sprayed TiO <sub>2</sub> and TiO <sub>2</sub> -ZnO electrodes .....	27
Studies of the photocatalytic efficiency of titanium dioxide powders and coatings obtained by plasma spraying .....	27
Titanium oxide – new opportunities for an established coating material .....	27
Photocatalytic properties of coatings sprayed from TiO <sub>x</sub> and Ti <sub>n-2</sub> Cr <sub>2</sub> O <sub>2n-1</sub> powders by APS and VPS .....	27
<b>Consumables for thermal spraying</b>	
Deposition of amorphous metallic coatings by thermal spraying .....	28
Plasma sprayed coatings from powders of alloyed cast iron mill debris .....	28
Maximization of silica loading in ball-milled composite powders for HVOF-sprayed multi-scale polymer/silica composite coatings .....	28
A comparative diagnostic analysis of morphologically different YSZ powders.....	28
Advantages of CO <sub>2</sub> cooling for thermal spraying .....	29
<b>Nanostructured materials ( I )</b>	
Plasma sprayed high lubricity nanocomposite coatings.....	29
Plasma spraying of silicon and titanium nitride nanoparticles for hard coatings and micropatterns.....	29
The formation behavior of thermal sprayed TiO <sub>2</sub> coatings using agglomerated nano-powders.....	29
Influence of induction plasma gas composition on Ti coatings microstructure and composition.....	30
Thermal and mechanical properties of alumina-zirconia nano-composite coating.....	30
Mechanical properties of plasma sprayed nanostructured titania coatings with Al addition.....	30
<b>Characterization methods for coating properties ( II )</b>	
Non-destructive adhesion testing of plasma-sprayed coatings using ultrasounds and laser shocks .....	30
The development of TiO <sub>2</sub> /PBS composite material by thermal spraying .....	31
Strain tolerance characterization for HVOF coatings using the acoustic emission tool.....	31
Deposition efficiency and microhardness of plasma sprayed zirconia coatings using different powders as feedstocks .....	31
Abradable properties of thermal sprayed coating for air compressor.....	32
<b>Nanostructured materials ( II )</b>	
Inductively coupled plasma processing of nano-sized calcium phosphate powders.....	32
Characterization of nanostructured and conventional cermet coatings by controlled scratch testing: correlation with abrasion and hardness tests.....	32
Microstructure and properties of Al <sub>2</sub> O <sub>3</sub> /YAG nano composite coating prepared by plasma spray .....	32
Comparative study of nanostructured and conventional WC-Co coatings .....	32
Nanophase partially stabilized zirconia intermediate layer for strain accommodation in a multi-layer thermal barrier coating .....	33
<b>Characterization methods for coating properties ( III )</b>	
Microstructure of Zr-O-B composite coatings produced by reactive thermal spray.....	33
Optical properties of plasma sprayed semiconducting oxides .....	33
Elastoplastic characterization of thermal spray coatings using instrumented indentation.....	33

Study of the influence of microstructure on electric properties of plasma-sprayed alumina coatings using the scanning electron microscope mirror effect (SEMME) method .....	34
Characterization of vacuum plasma sprayed boron carbide .....	34
<b>Characterization methods for coating properties ( IV )</b>	
Bioactivity and biocompatibility of plasma sprayed ceramic coatings .....	34
Measurement of a low power plasma jet by the enthalpy probe .....	34
Properties of plasma sprayed alumina-chromia mixtures .....	35
Study on porosity of plasma sprayed coating by digital image analysis method .....	35
Comparison of in-flight particle characteristics and coating properties while spraying NiCrBSi powder with different spraying processes.....	35
Evaluations of strength of thermal sprayed coating with crack .....	35
<b>Economics and quality</b>	
Metallographic evaluation and process correlation of thermally sprayed coatings.....	35
Off-line programming for spraying and laser cladding of three-dimensional surfaces.....	36
Plasma quality at combustion price .....	36
Prediction of plasma sprayed coating properties by the use of neural networks.....	36
<b>Characterization methods for coating properties ( VI )</b>	
Influence of substrate surface roughness on adhesive property of sprayed coating.....	36
Composition changes of selected alloys during their plasma spraying .....	37
Influence of plasma spraying parameters on the in-flight oxidation of stainless steel particles.....	37
Physical characteristics of alumina coating using atmospheric plasma spraying (APS) and low pressure plasma spraying (VPS).....	37
Microstructure and properties of FeNb and FeSi coatings obtained by HVOF thermal spraying .....	37
<b>Corrosion protection ( II )</b>	
Corrosion protection of a metal spray coating by using an inorganic sealing agent for its micropores .....	38
Investigations of corrosion properties of different ceramic-metallic coatings sprayed the HVOF process .....	38
Corrosion resistance of Fe-Cr-Mo-(C,B,P) amorphous coatings thermal sprayed by HVOF and APS processes.....	38
Effect coating thickness and the sealant on the steam oxidation resistance of APS Ni-Cr coatings.....	38
<b>New technologies for pre-and post-treatment ( I )</b>	
The relationship of work distortion and surface roughness on grit blasting process .....	39
New developments in the protal <sup>®</sup> process .....	39
Pack boronizing of HVOF-sprayed WC-Co coatings .....	39
A parameter study of the protal <sup>®</sup> process to optimise the adhesion of Ni5Al coatings.....	39
<b>New technologies for pre-and post-treatment ( I )</b>	
The influence of post heat treatment processes on thermal fatigue resistance of thermally sprayed coatings.....	40
Effects of sealing on electrochemical characteristics of WC-NiCr HVOF sprayed coatings.....	40
Influence of post-treatment on the tribo-mechanical properties of cermet coatings .....	40
Strengthening alumina protective layer on MCrAlY atmospheric plasma sprayed coating by chromate processing .....	40
<b>Modeling and simulation ( I )</b>	
Numerical simulation of a multi-component reacting plasma jet in plasma spraying .....	41
An advanced ceramic coating buildup model for thermal spray processes.....	41
Three-dimensional and time-dependent model of the dynamic behavior of the arc in a plasma spray torch.....	41
Computational evaluation of coating characteristics in ceramic spraying .....	41
Computational model for the prediction of the temperatures in the coating during thermal spray.....	41

## Process diagnostics ( I )

Computational heat transfer and phase change in composite (metal/ceramic) particle immersed in a plasma pool .....	42
Effect of measurement technique on particle temperature and velocity values in a plasma spray jet .....	42
Particle diagnostics in wire-arc spraying system.....	42
Process analysis of plasma spraying of recycled PET based on a heat balance model.....	42
The influence of plasma characteristics on particle properties during plasma-spraying of yttria stabilized zirconia using a Triplex torch .....	43
Diagnostics for thermal coating processes – Research results of the DFG-founded project group .....	43

## Protective coatings against wear and erosion ( I )

Tribological behaviour of thermally sprayed ceramic coatings in contact with 100Cr <sub>6</sub> steel at high temperatures .....	43
Tribological properties and microstructure of plasma sprayed high silicon aluminium alloy coatings .....	43
Tribological behavior of D-Gun and atmospheric plasma spraying coatings on light weight materials .....	44
Erosion mechanism of thermally sprayed coatings depending on shape and hardness of particles.....	44

## Process diagnostics ( I )

Computer tomography of plasma jets – applied on a TRIPLEX II torch.....	44
On a prospective on-line APS process control based on artificial neural networks.....	44
Investigation of arc voltage fluctuations in a plasma torch SG-100 operated with Ar/H <sub>2</sub> .....	44
In-situ measurement of sprayed ceramics particles and supercooling effects on splat morphology .....	45
Experimental investigation of the splashing processes at impact in plasma sprayed coating formation.....	45

## Modeling and simulation ( II )

Process optimisation of plasma spraying using statistical modelling .....	45
Measurements of elastic-plastic anisotropic properties of thermally sprayed coatings using nano-indenters and inverse analysis technique .....	45
Modeling of inductively coupled plasma flows in a reactor: comparison with experimental results.....	46
The system approach for structure – properties relationship of thermal sprayed coatings .....	46
Supersonic plasma jet modelling at low pressure using recent advances of the enthalpy probe measurement technique .....	46

## Corrosion protection ( I )

Erosion and erosion-corrosion properties of HVOF sprayed tungsten carbide (WC) coatings with high alloy binders .....	46
Corrosion protective coatings by modified underwater plasma spraying .....	46
Vibrational corrosion potential of hastelloy coatings by GS-HVOF spraying.....	47

## Modeling and simulation ( III )

Modeling of thermal plasma jets: a comparison between phoenics and fluent .....	47
Molecular dynamics simulation on flattening process of a high-temperature and high-speed droplet .....	47
Prediction of coating microstructure.....	47
Study of the porosity in plasma-sprayed alumina through an innovative 3-dimensional simulation of the coating build-up .....	48

## Nanostructured materials ( III )

Phase formation of nano-TiO <sub>2</sub> particles during flame spraying with liquid feedstock .....	48
Wear characteristics of plasma sprayed nanostructured yttria partially stabilized zirconia coatings.....	48
Fatigue and mechanical properties of nanostructured WC-Co coatings .....	48
Nano structured WC-12Co coatings sprayed by HVO/AF.....	49

## Modeling and simulation ( IV )

Numerical simulation of a multi-component reacting plasma jet in plasma spraying .....	49
Heating and impact modeling of HVOF sprayed polymer particles.....	49
A CFD analysis of the relationships between process parameters and particle in-flight characteristics in flame spraying .....	49
Modelling of plasma jet and particle behaviour in spraying conditions.....	50

## ITSC 2004 poster session

### Applications

FeSi and FeSiB nanostructured powders deposits via HVOF thermal spraying .....	50
Comparison of the corrosion resistance between Cr <sub>3</sub> C <sub>2</sub> -NiCr obtained by HVOF and hard chromium .....	50
Solution plasma spray synthesis of NiZnFe <sub>2</sub> O <sub>4</sub> magnetic nanocomposite thick films .....	50

### Innovative equipment and process technology

Plasma flow characteristics of supersonic nitrogen/hydrogen-mixture plasma jets for nitriding .....	50
The effect of simultaneous laser irradiation on HVOF spray coatings .....	51
HVOF and detonation spraying iron aluminides powders .....	51
Comparison of stainless steel coatings alumina reinforced by plasma spraying of different size mechanofused particles .....	51
The effect exerted by modulation on disintegration of the particles being sprayed .....	52
Plasma spraying of nanodiamonds and metal powders with nanodiamonds additives .....	52
Evaluation of corrosion and wear resistance of hard cermet coatings sprayed by using an improvement HVOF process .....	52
Ti-B-C composite coating produced by electrothermally-exploded-powder-spray technique .....	52
High-rate deposition of ZrO <sub>2</sub> coatings by thermal plasma PVD .....	52
Slurry feed of fine powder .....	53
On the effects of the spray kinematics on the deposited bead shape and structure of thermal spray Al <sub>2</sub> O <sub>3</sub> -TiO <sub>2</sub> (13% by wt.) .....	53
Development of transportable plasma spraying system .....	53
Synthesis of catalysts using a high frequency plasma system for reforming of ethanol .....	53
Deposition of polymer coatings using a combined thermal spraying-laser assistance process .....	53
Real time monitoring of robot trajectory in thermal spraying .....	54
Processing and characterization of novel AlSi/Polymer abrasable coatings by means of atmospheric plasma spraying .....	54
Plasma sprayed nanostructured glass-ceramic matrix composite coatings from the CaO-SiO <sub>2</sub> -ZrO <sub>2</sub> eutectic system .....	54
Tribo-corrosion testing on thermal spray coating: new equipment and preliminary results .....	54

### Characterisation methods for coating-properties

Investigation of structure and mechanical properties of plasma sprayed alumina coatings with various plasma gas mass flow .....	55
EBSP Analysis of plasma sprayed Ni-Al deposits .....	55
Effect of rare earth elements on the wear resistance of iron-based thermal sprayed coatings .....	55
A study of thermally cycled plasma-sprayed thermal barrier coating .....	55
Corrosion characterization of Zn alloy coatings and Al alloy coatings with combined cycle corrosion tests .....	56
Corrosion behavior of high velocity arc spraying Fe-Al coatings .....	56
Cold spray processing of WC-Co .....	56
Synthesis of nanocrystalline iron aluminide intermetallic compound coating by spraying of mechanically alloyed powder .....	56
Fabrication of nano-structured WC-Co coating by HVOF spraying of mechanically alloyed powder and evaluation of its property .....	56
Optimization of impulse-plasma treatment parameters of surface layers of gas-thermal composite coatings .....	57
Strain analysis of interfacial debonding in Al <sub>2</sub> O <sub>3</sub> sprayed substrate metal under tensile loading .....	57
Wear resistance of plasma sprayed WC-Co-Ni coatings .....	57
Thermal conductivity and isothermal shock resistance of Y-PSZ TBCs in situ remelted during their deposition .....	57
Characteristics of titanium oxide coatings prepared by APS and VPS spraying of nanostructured titanium dioxide powders .....	58
Evaluation of NiCr based Cr <sub>2</sub> O <sub>3</sub> coating characteristics with solid lubricant using the atmospheric plasma spraying .....	58
Effect of steam oxidation on the substrate microstructure adjacent to the Ni-Cr coatings .....	58
Improvement of electrical conductivity of plasma-sprayed YSZ coating by liquid sintering of Mn and Mn-Cu metals .....	58
Processing and characterization of nano-structured WC based coatings .....	59

Photocatalytic property of TiO <sub>2</sub> /plastic composite coating .....	59
Isotropic nanostructured titania thermal spray coatings .....	59
Alumina coatings on preoxidized low carbon steel – Interfacial phenomena between alumina and iron oxide layer .....	59
Alumina: Splat morphology on alumina substrate .....	60
Incorporating high aspect ratio reinforcements in HVOF sprayed polymer/carbon composite coatings .....	60
Properties of HVOF sprayed multi-scale polymer/silica nanocomposite coatings .....	60
Crack initiation and propagation in an APS thermal barrier coatings under cyclic loading .....	60
Wear properties of ceramics and cermet coatings formed by electromagnetically accelerated plasma spraying .....	60
Influences on characteristics of Al <sub>2</sub> O <sub>3</sub> coating caused by deviated spray conditions and its control .....	61
Macrocrack formation in plasma-sprayed zirconia TBCs with thick passes .....	61
Effects of heat treatments on the properties of NiCrBSi alloy + WC-Co coating .....	61
Effect of Cr <sub>3</sub> C <sub>2</sub> -NiCr powder characteristics on the properties of the HVOF coatings sprayed with different barrel lengths .....	61
Rolling contact fatigue strength and young's modulus of plasma sprayed alumina coating .....	61
Development of thick thermal barrier coating with varying porosities and continually high functional properties .....	62
An investigation into the relationship between the microstructural characteristics and the material properties of Al-Si + hBN abrasable coatings .....	62

### **Process diagnostics**

Characteristic evaluation of alumina spray coating by cavitation erosion method .....	62
Study of the erosion of electrodes in d.c. plasma torches by on-line monitoring of the voltage and sound .....	62
A diagnostics and monitoring system for low pressure plasma spraying processes .....	63
Substrate temperature control during supersonic induction plasma spraying .....	63
Acoustic emission responses during indentation of fine-grained MoSi <sub>2</sub> coatings .....	63

### **Modelling and simulation**

Simulation of the layer composition in thermal sprayed functionally graded coatings in terms of numerical optimisation .....	63
A homogeneous material model approach of an APS-sprayed PYSZ-TBC considering the APS-process-parameters and the TBC-microstructure .....	64
Modeling and optimization of HVOF processes .....	64
Numerical study of residual stresses formation during the APS process .....	64
Heat transfers at the impact of a plasma jet on a two-layer material .....	64
Prediction of thermal spray coating thermal conductivity by 2D heat transfer modeling .....	65
Computer complex modeling of coatings gaseous detonation spraying process .....	65
Modeling of a substrate thermomechanical behavior during plasma-spraying preheating stage .....	65
Computational head transfer modelling in plasma surface interaction .....	65

### **New technologies for pre and post treatment**

Spark plasma sintering (SPS) as post-spray remedy for decarburization in plasma sprayed WC-Co coatings .....	65
--	----

### **Economics and quality**

A new shear test for characterization of coating adhesive or cohesive failure .....	66
---	----
