Preface

Proceedings

Furnace Brazing

Effects and developments of pressure aided brazing on large scale, planar joints	1
F. J. Gemse, J. Pfeiffer, P. Müller, M. Salge	
Influence of process parameters in vacuum brazing on the shear strength of brazed joints	3
K. Bobzin, H. Heinemann, J. Hebing, M. Erck, A. Jöckel, J. Baumgartner, W. Tillmann, J. Bültena	
Effects of Joint Design and Interlayers on Ceramic-Metal Joints	10
K. Amin, M. Allen and N. Ludford	
Effect of Specimen Joint Design on Wetting Phenomenon by In-Situ Observation Method	10
H. Tajima, S. Katakura, Y. Miyazawa; and K. Furihata, K. Kurose	
Nickel-braze coated stainless steel sheets for the production of complex brazed assemblies .	27
U. Holländer, C. Pfeffer, S. Hübner, L. Albracht, K. Möhwald, B.-A. Behrens, H.J. Maier	

Advanced Filler Alloys

Improving corrosion resistance in Ni-Cr-P and Ni-Fe-Cr-P based amorphous brazing foils ..	32
E. Theisen and W. Coughlan	
Development of copper-aluminium composite brazing wires for brazing stainless steels	38
U. Holländer, M. Schmieding, K. Möhwald, H.J. Maier	
Properties of Ni nanopastes for structural joining as an alternative to conventional braze fillers.....	44
B. Sattler, S. Hausner and G. Wagner	
The Performance of a Brazing Filler based on a Eutectic High Entropy Alloy Designed by Machine Learning	50
X. S. Morell, R. Goodall, E. Pickering, P. Webb, P. Rodgers	

Properties of Brazed Joints

Influence of the microscopic condition of brazing fillets on the fracture behavior of brazed joints	57
W. Tillmann, J. Bültena, A. Jöckel, J. Baumgartner, K. Bobzin, H. Heinemann, J. Hebing, M. Erck	
Alloying-dependent microstructure influence on corrosion fatigue mechanisms of vacuum brazed AISI 304L/NiCrSiB joints	63
J. L. Otto, A. Kalenborn and F. Walther	
Effect of Morphic Difference between Foil and Powder on Brazed Area Corrosion Resistance	69
K. Yamazaki, H. Kato, Y. Miyazawa; Y. Bizen	
Microstructural influence of current assisted brazing on properties of nickel brazing alloys	76
K. Bobzin, H. Heinemann, J. Hebing	
Fast and reliable Ag-Sn transient liquid phase bonding by use of rapid heating and low-energy ultrasound	83
B. Rheingans, L. P.H. Jeurgens, and J. Janczak-Rusch	

Diffusion Bonding

Development of a Novel Diffusion Bonding Technique for Al-Alloys	89
J. Redman, N. Ludford	
On the Relation of Bonding Temperature, Contact Pressure and Deformation on the Mechanical Properties of Diffusion Bonded AISI 304	103
T. Gietzelt, M. Walter, V. Toth, M. Kraut, F. Messerschmidt, M. Blem	
Recent developments in diffusion bonding – equipment and applications	116
S. Jahn, F. Gemse	

Industrial Application of Brazing and Diffusion Bonding

Justification for replacing BAu-4 precious metal braze filler metal with Pal 30 Ni-based braze filler metal for dissimilar stainless-steel joints	122
W. Miglietti and M. Graham	
The effect of morphic differences between Ni-based brazing foil and paste on brazeability with spreading and gap-filling test	133
Y. Bizen, H. Eguchi, K. Kanda, S. Takahashi and Y. Miyazawa	
Characterisation and performance of a novel high entropy alloys as a braze filler metals for vacuum brazing	138
J. Redman, A. Sergi, N. Ludford, D. Luo, R. Goodall	

Flux-free joining of dissimilar materials	153
L. Wojarski, H. Ulitzka, I. Rass, W. Tillmann, T. Kuhnke, F. Jenau, J. Risse, T. Ulitzka	
Brazing of Demanding Materials and Joints	
Development of low-temperature active solders	162
L. Hardwick, Y. Xiao, R. Goodall	
Brazing of cemented carbide with low silver content brazing filler metal	169
K. Matsu, K. Shi, T. Kishimoto, T. Terui, T. Takahashi	
Potential of maraging steel as a joining partner for cemented carbide	175
W. Tillmann, T. Ulitzka, L. Dahl, A. Salmanibideskan, L. Wojarski, H. Ulitzka	
Vacuum brazing of super duplex stainless steels and corrosion resistance	187
K. Georgilas, P. Brooker, J. Redman, N. P. Ludford	
An Investigation into the Shear Strength of Furnace Brazed Joints using Additively Manufactured Surfaces	197
F. Livera, R. Goodall, I. Todd, M. Cuddy	
Joining of Glass, Ceramics and Metals	
Joining of ceramics: solders, surface activation, stress reduction and achieved properties ...	203
C. Steinborn, I. Rass, J. Kolberg, H.-P. Martin	
Joining behaviour of glass composite sealant for oxygen transport membrane application ...	211
X. Li, S. M. Groß-Barsnick, T. Koppitz, G. Natour	
Laser Based Metallization of Materials with Low Wettability for Joining of Hybrid Material Combinations	221
D. Maischner, A. Weisheit, I. Rass, J. Kolberg, T. Kolberg	
Quality Assurance, Process and Product Quality	
Spreading behavior of brazing material on additive manufactured material – Spreading gap sample design	226
J. Awayes, E. Thannhäuser, I. Reinkensmeier and C. Fleck	
Development of an optical inspection method for evaluating the surface condition of metal surfaces to be brazed	235
L. Wegewitz, F. Bürger, W. Maus-Friedrichs, U. Holländer, K. Möhwald, H. J. Maier	

Influence of the shielding gas quality on microstructure and mechanical properties of induction brazed joints using Ni60CrPSi 245

T. Uhlig, V. Fedorov, G. Wagner, S. Weis

Non-Destructive Evaluation of Ceramic-to-Metal Brazed Joints by Means of X-ray Inspection and Helium Leak Detection Techniques 254

E. Ongun, G. Genç

Modeling and Simulation

Extrapolation of short-time creep tests to long-time creep values: Selection of a model for brazed and soldered joints 269

A. E. Shapiro

Capillary Flow of Aluminum Braze in Microgravity 280

D. P. Sekulic, Y. Wu, S. D. Mesarovic, K. Lazaridis, M. D. Krivilyov

Improving the properties of high-temperature brazed components by an analytical prediction of temperature-time-cycles 286

J. Maiss, A. Sokolov, S. Glane, A. Morozov, J. Wilden, and W. H. Müller

Calorimetric Analysis of Ternary Fe-Ni-Si alloys for Novel Fe-based Brazing Foils 292

K. Bobzin, H. Heinemann, J. Hebing, O. Stryzhyboroda, S. Vinke

Poster Session

High Entropy Alloy brazing filler metal design for joining Cu to CuCrZr at intermediate temperatures 299

D. Luo, R. Snell, Y. Azakli, M. Cuddy, J. Redman, N. Ludford, R. Goodall

Vacuum Brazed Titanium-Stainless Steel Transitions for Cryogenic Applications 306

F. Motschmann, A. Gallifa Terricabras, S. Barriere, T. Demaziere

In-situ observations of spreading behaviour of SAC305 solder on silver and copper substrates 312

O. Olukoya, R. Goodall, E. Raj, J. Matthey

Glass sealants for liquid sodium metal batteries 317

E. Gülbahar, G. Dück, S. M. Groß-Barsnick, T. Koppitz, G. Natour, C. Roos

Precision Brazing of Molybdenum Preforms for Obtaining Hermetically-sealed and Robust Joints for Advanced Functional Components 326

E. Ongun, G. Genç

Brazeability estimation of brazing filler metal produced by a new manufacturing method 335

A. Kato, M. Sakai, A. Hara, Y. Miyazawa

Structure-property relationship in high-strength aluminum alloys / stainless steel brazed joints	341
V. Fedorov, T. Uhlig, G. Wagner	
New Brazeability Evaluation Method Using the Shape of Wetting Spread Area of Brazing Filler Metal	348
M. Yagyu, H. Tajima, H. Nagata, Y. Tsukamoto, Y. Miyazawa	
The effects of Ag-based fillers' Ti content and elasto-plastic properties on the mechanical behavior of Nb-interlayer inserted Ti-6Al-4V/Si ₃ N ₄ joint	355
F. S. Ong, H. Tobe and E. Sato	
List of authors	360
