

Table of contents

Preface

Time Schedule

Proceedings

Power Storage

Development of Dense and Low Oxide Titanium Coatings for PEMWE Application..... 1

K. Bobzin, H. Heinemann, E. Olesch, K. Radermacher

Plasma-spray deposition of Na₃Zr₂Si₂PO₁₂ electrolyte for high performance all solid-state sodium-ion battery 8

X.-C. Bu, N. Chen, X.-T. Luo, C.-J. Li

Automotive Industry

Cold Atmospheric Plasma Metallization of Power Semiconductor Devices with CuSn Pseudo-Alloys for Diffusion Soldering..... 17

M. Ockel, A. Gökçen, B. Ottinger, M. Petersen, C. Voigt, J. Franke

Laser Cladding I

Comparative Studies of SUS316L Layer Deposited by Conventional Laser Cladding and Extreme High Speed Laser Cladding..... 27

T. Izumi, A. Yano, and M. Arai

Further Applications

Thermally sprayed coatings for dynamic magnetic data storage 34

M. Nicolaus, M. Arndt, M. Wurz, K. Möhwald, H. J. Maier

Flammspritzen - HVOF - Verschleisschutz - Korrosionsschutz

info@cremer-beschichtungen.de

Young Professionals Session

Subsurface Weave Pattern Influences on Cold Spray Deposits onto Woven Fiber Reinforced Composites	40
M. Kaminskyj, N. Mennie, N. Singh, B. Koohbor, F. M. Haas	
Techno-Economic Assessment of Utilization of Cold Spraying Process for Fabrication of Resistive Heating Elements for Temperature Protection of Steel Pipes	49
M. Rezvani Rad, P. Menghesha, M. O. Jarligo, A. McDonald	
Soilless Cultivation via Thermal Spraying	59
P. Biswal, M. Hauer, L. Möhrke, A. Gericke, S. Rasche, H. Schinkel, K.-M. Henkel	
Calibration of the Critical Velocity in Cold Gas Spraying.....	67
L. Wiehler, J. Capan, Z. Arabgol, C. Huang, A. List, F. Gärtner, T. Klassen	
Effects of Plume Targeted Cooling on Residual Stress in Controlled Atmosphere Plasma Sprayed Coatings	74
E. E. Peleg	

Aviation Industry I

Processing and suspension plasma spray deposition of ZrO ₂ -based ceramic materials for thermal barrier coatings	75
M. C. Galeano Camacho, H. Ageorges, J. Muñoz-Saldaña	

Medical Industry

Cold Spray of Ta-Ag Composites: Correlation Between Microstructure and Antibacterial Properties	83
P. Yu, G. Perumal, K. J Genoud, R. Lupoi, S. Yin, F. J O'Brien, D. Brabazon	

Modelling & Simulation I

Understanding the Effect of Mo Concentration on the Strength of AlCoCrFeMo High-Entropy Alloy Using Atomistic Simulations	100
N. Jalal, M. O. Jarligo, A. McDonald, W. Stroberg	

Laser Cladding II

Investigations on laser cladding of tin-bronze on steel	108
H. Freisse, E. Isère, T. Schudeleit, F. Rippa, D. Keller	
COAXquattro: A Versatile High-Power Multi-Wire Laser Cladding Technology	114
F.-L. Toma, H. Hillig, M. Kaubisch, I. Shakhverdova, M. Seifert, F. Brückner	

Repair & Recycling

Trajectory Optimization for Repair by Robot-guided Cold Spray 123

M. Lewke, H. Wu, A. List, F. Gärtner, T. Klassen, A. Fay

Numerical simulation of the shaft parts repairing process by laser metal deposition technique 130

Y. Meng, M. Arai, T. Izumi

Is particle hardness the decisive factor for adhesion in cold spray? 138

M. Steierl, F. Gärtner, T. Klassen

Characterization & Testing Methods I

Exploring the Crack Propagation Behaviour in Suspension Plasma Sprayed Thermal Barrier Coatings: An In-Situ Three-point Bending Study in Scanning Electron Microscope 139

M. Amer, N. Curry, M. Arshad, Q. Hayat, V. Janik, J. Nottingham, M. Bai

Performance of Thermally Sprayed Inconel Coatings in Erosion-Corrosion Conditions of Biomass-Fired Boilers 152

R. Verma, G. Kaushal

The influence of incursion rate on abrasability of AlSi-hBN abrasable seal coating 159

T. Liu, J. Liu, D. Zhang, Y. Hou

FINALIST
Großer Preis des
MITTELSTANDES

Ceramic Coatings

Understanding the formation of different surface structures of hydrophobic ceramic coatings deposited in the SPAPS process and SPVPS process 166

P. Xu, X. Sui, T. W. Coyle, L. Pershin, J. Mostaghimi

Development and understanding of CMAS coating on YSZ using APS technique 176

A. Roy, F. B. Ettouil, R. S. Lima, C. Moreau

Corrosion Protection I

Comparative Analysis of Cold Sprayed and HVOF Sprayed NiCrTiCRe coating on T22 Boiler Steel in Thermal Power Plant Boiler Environment 185

N. Bala, H. Singh, S. Prakash

Thermal Spray in a Nutshell I

Plasma spraying – from single to multiple electrodes 194

G. Mauer

Suspension spraying 195

F.-L. Toma

Thermal Spray in a Nutshell II

Cold spraying 196

F. Gärtner

Isolating Coatings

Enhanced Coating Deposition by Development of Oxide Shelled Aluminium Nitride 197

K. Bobzin, H. Heinemann, E. Olesch, A. Aslankaya

Power Generation

Properties of Novel Partially Amorphous Fe-based Thermal Barrier Coatings under the Influence of Cryogenic Temperature and Hydrogen 204

M. Hauer, L. Möhrke, P. Biswal, O. Brätz and A. Gericke, B. Allebrodt, K.-M. Henkel

Refurbishment Process of Platform Combustion System of SGT5-8000H 213

B. Burbaum, I. Just, W. Remmert, M. Gralki

Air plasma-sprayed MCrAlY coatings with low oxide content enabled by adding a deoxidizer 221

Y.-S. Zhu, X. Xue, X.-T. Luo, C.-J. Li

Hot corrosion behaviour of yttria stabilized zirconia and La₂Ce₂O₇ based dual coatings 228

A. Pakseresht, A. Suyambulingam, A. Sekar, M. Parchovianský

Maritime Industry & Offshore Technologies

Data-Driven Mitigation of Process Fluctuations in Wire-Arc Spraying 233

K. Bobzin, H. Heinemann, L. M. Johann

In-field Repair for Maritim Hardware Using High-Pressure Cold Spray 240

H. P. Höll, K. Klus, A. T. Nardi, R. M. Gerani, D. Stanley, T. J. Eden

Cavitation Erosion in HVOF Thermally Sprayed WC-NiCrBSi Coatings 248

A. Algoburi, R. Ahmed, V. Kumar

Aviation Industry II

Effect of Pt additions on the bond coats of the Thermal Barrier Coating systems
in aero gas turbine engines 256

T. B. Usubaliyev, A. S. Samedov, P. Sh. Abdullayev

New Processes

Influence of Substrate Patterns on the Coating Microstructure in
Aerosol-deposited Alumina Coatings 257

Z. Yang, A. Dolatabadi, T. W. Coyle

In-Situ SEM Observation of Mechanical Failure of Hybrid Plasma Spray Coatings 266

R. Musalek, T. Tesar, J. Minarik, R. Genois, J. Dudik

A new approach for the application of highly reactive metals 278

M. Rodriguez Diaz, M. Szafarska, René Gustus, K. Möhwald, H. J. Maier

HVOF/HVAF-Spraying

Gas-fuel HVOF and its influencing factors: introducing the total gas flow 284

C. Hambrock, W. Rannetbauer, S. Hubmer, R. Ramlau

Highly Porous Titanium Coatings for Proton Exchange Membrane Water
Electrolysis Application by HVOF 291

K. Bobzin, L. Zhao, H. Heinemann, E. Olesch

Suspension Spraying

Physical mechanisms in plasma spray processing of suspensions 298

A. Chergui, C. Lebot, V. Rat, G. Mariaux, A. Denoirjean

Parameters influencing the photocatalytic activity of suspension sprayed
ZnO-TiO₂ coatings 310

A. Meyer, F.-L. Toma, O. Kunze, A. Potthoff, C. Leyens

Gas & Fuel Industry

- An optical and metallurgical comparison of chrome free and chrome containing Al-Si slurry diffusion coatings for Gas Turbine Applications 319

S. Higgins, T. D. A. Jones, Q. Zhao

- Study the Impact of Process Parameters of Laser Cladding Nickel-Chromium Alloy Powder on Substrate Melted Areas 325

R. A. Ahmed, R. S. Khan, M. M. Qahtani, A. Alsayoud, A. S. Bukhari

Pre- & Post-Treatment

- Influence of laser fusing parameters on the microstructure evolution of thermally sprayed self-fluxing NiCrBSiFe coatings 336

B. Preuß, T. Lindner, G. Töberling, S. Kaur and T. Lampke¹

- Effect of surface preparation by laser texturing in thermal spraying on the fatigue life of the Ti-6Al-4V alloy 343

E. Pegane-Vingadas, M. Chaussumier, A. Soveja, S. Costil

- Improved adhesion of plasma-sprayed ceramic coatings on textured ceramic substrates 356

T. Ferrasse, S. Costil, G. Darut, B. Bouteiller, M. C. Auscher

Functional Coatings

- Comparative Analysis of Mechanical Properties of Thermally Sprayed Cu and Zn Coatings on Fibre-Reinforced Plastic for Enhanced EMC Applications 365

J. Gebauer, S. Scheitz, C. Rothe, A. Paul, P. Kanagarajah, M. Reif

- Microstructure evolution and oxidation behavior of thermal barrier coatings with varying cold sprayed bond coats after isothermal heat treatments 376

S. Dosta, C. R. C. Lima, V. Crespo, J. Nin, G. Clavé

Corrosion Protection II

- Investigation on oxidation and interdiffusion in the systems of aluminiferous coatings and superalloys 382

X. Sun, J. Moverare, X.-H. Li, R. L. Peng

- Tribology behaviour of HVOF and HVOF sprayed WC-CoCr coatings on light alloys 386

T. Owoseni, M. Gupta, I. Mare, T. Varis

- The impact of YSZ powder morphology and chemical composition on the efficacy of Thermal Barrier Coatings (TBCs) used in industrial applications 398

G. Bolelli, S. Bursich, G. Cavazzini, L. Lusvarghi, S. Morelli, C. Ricci, E. Rossi, M. Sebastiani, P. Puddu

Metals Processing

Optimization of the Ni-coating geometry and microstructure of large surfaces by laser cladding on cast-iron molds used in glass industry 399

F. Bourahima, T. Lauridant, C. Guasch, T. Baudin, A.-L. Helbert

High-Speed Laser melt Injection for Reinforcing Skin-Pass Rolls 409

P. Warneke, A. Bohlen, T. Seefeld

Cold Gas Spraying I

Comprehensive Characterization of Annealed Coatings: Investigating Roughness and Wear Performance through Wear Testing and Analysis 418

N. Sheibanian, R. Sesana, S. Özbilen, R. Lupoi

Characterization & Testing Methods II

Fast and non-destructive mechanical characterization of coatings from thermal spraying and laser cladding: automated surface acoustic wave spectroscopy as a new tool for quality control and research 427

M. Zawischa, S. Makowski

Characterizing deformation by positron annihilation spectroscopy: cold spray vs. high-pressure torsion 437

J. Cizek, J. Medricky, F. Stefanik, F. Lukac, O. Melikhova, J. Cizek

A micro-spectroscopic approach to characterizing residual stresses and subsurface modifications due to high-speed collision during cold spray deposition of metals on glass substrates 444

A. K. Elkholey, D. de Ligny, R. N. Raelison, C. Verdy, P. Bertrand, C. Langlade

BodyClad® High Wear Performance
Claddings - Wear Parts - Wear Plates - Maintenance - Sustainable

Data Driven Models & Artificial Intelligence

Physics-Informed Neural Networks for Predicting Particle Properties in Plasma Spraying	452
----------------------------------------------------------------------------------------------	-----

K. Bobzin, H. Heinemann, A. Dokhanchi

Databased Optimization of Coating Characteristics – Challenges and Possible Solution	459
--------------------------------------------------------------------------------------------	-----

W. Rannetbauer, C. Hambrock, S. Hubmer, R. Ramlau

Additive Manufacturing I

Towards an integrated modular cold spray additive manufacturing system.....	469
-----------------------------------------------------------------------------	-----

W. Li, H. Wu, S. Liu, H. Liao, S. Costil, S. Deng

An Investigation on the Effect of Deposition Technique on Microstructural and Mechanical Properties of WC-17Co Deposited Using Direct Energy Deposition (DED) and High-Velocity Oxygen Fuel (HVOF)	483
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

T. Grabowski, F. Azami, M. McDonnell

From Anticosti Island's 'Deep Time' to A Cold Spray Additive Manufacturing Art Creation	495
-----------------------------------------------------------------------------------------------	-----

A. Nastic, B. Jodoin, C. Fitzgerald, S. Desaulniers, L. Pouliot, F. Caio, D. Macdonald, A. Duval, G. Dubois, V. Tessier, C. Etienne

Additive Manufacturing II

Experimental and numerical study of the spattering dynamic mechanisms in selective laser melting	508
--------------------------------------------------------------------------------------------------------	-----

S. Qin, W. Zhang, S. Yin, S. Lei

The effect of powder particle size on mechanical and fracture properties of cold sprayed Al	514
---------------------------------------------------------------------------------------------------	-----

O. Kovarik, F. Wick, L. Wiehler, C. Huang, J. Cizek, A. List, F. Gärtner, T. Klassen

Cold Gas Spraying II

Improving Adhesion Strength by Laser Assisted Cold Spraying of Mild Steel	520
---------------------------------------------------------------------------------	-----

F. Caio, A. Nascimento, Luc Pouliot, D. MacDonald, J-G. Legoux, D. Poirier, M. Martin

Evaluation of lightning resistance property of thermoplastic CFRP metallized by low-pressure cold spray	521
---------------------------------------------------------------------------------------------------------------	-----

H. Saito, W. Kai, T. Funaki, Y. Ichikawa, K. Ogawa

Studies of Particle Deformation and Microstructure Evolution Using High Strain Rate Particle Compression Test	528
---------------------------------------------------------------------------------------------------------------------	-----

G. J. Na, A. Hashizume, Q. Tang, M. Hassani, Y. Ichikawa

Cold Gas Spraying III

In-Situ Studies of Impact-Induced Bond Strength at the Single Particle Scale 535

Q. Tang, M. Hassani

Powders, Wires, Suspensions

Plasma-Sprayed Bulk-like Ni-based Alloy Coating Enabled by Boron-containing Powder Design with exceptional High Tensile Strength 536

C.-Jiu Li, X.-Y. Dong, J.-J. Song, Y.-S. Zhu, X.-T. Luo, L. Zhang

Process Diagnostics, Sensors & Controls I

Offline robot programming for generating coating paths quickly and accurately 543

S. Schneebei, D. A. Karandikar

Opportunities and Limitations of a Holistic Process Monitoring System for Arc Processes 549

S. Weis, S. Brumm, R. Grunert, M. Halmaghi, J. Morgenschweis, J. Bosler

Hot or cold particles
– contact us first

The best thermal spray and cold spray diagnostic tools for quality control as well as for your research and development needs.

SprayWatch SprayWatch systems for APS, HVOF, HVAE, WA etc.

HiWatch HiWatch systems for cold particle processes.

 **Oseir** More information and details at oseir.com

Backed by 20 years of experience in particle measurement!

Modelling & Simulation II

Computational Quantitative Validation of Multiphase High-Entropy Alloy Coating
Using Non-Equilibrium CALPHAD Simulation 557

E. Bosi, A. Meghwal, S. Singh, P. Munroe, C. C. Berndt, A. S. M. Ang

Tribological Coatings I

A Comparative Investigation of Feedstock Materials on Multiple Properties of
HVOF-Formed Cr₃C₂-NiCr Coatings: Size Effects of Powders and Carbides
on Sliding Abrasive Wear Behavior 558

X. Ma, P. Ruggiero

Hard-Facing Coatings for Agriculture Tools 570

L. Möhrke, M. Hauer, P. Biswal and A. Gericke

Dynamic impact wear behavior of HVOF sprayed hardmetal coatings 580

Š. Houdková, J. Duliškovič, M. Vostřák, T. Taranda, O. Skála, R. Musilová, J. Daniel, L.-M. Berger

Metal Coatings

Enhancing the Optimized HEA Bond Coating in TBC Systems via HVOF Technique ... 594

H. Shahbazi, R. S. Lima, P. Stoyanov, C. Moreau

Tribological Coatings II

Tribology of self fluxing ceramic coatings prepared using external feeding
hybrid plasma spraying 611

T. Tesar, R. Musalek, F. Lukac, J. Walter, L. Cvrcek, J. Cech

The Performance of Metal Based Abradable Sealing Coatings Based on Peeling
Medium Particle Structure Design 617

D. Guo, J. Liu, T. Liu, C. Wu

Process Diagnostics, Sensors & Controls II

In Situ Spray Bead Acquisition and Analysis for Coating Thickness Predictions 623

U. Hudomalj, I. Aschwanden, L. Weiss, M. Nabavi, K. Wegener

Poster Sessions

Applications – Automotive Industry

Analysis of Different High-Velocity Thermally Sprayed Coatings to Recover AISI H13 High-Pressure Die-Casting Molds	632
-----------------------------------------------------------------------------------------------------------------------------	-----

A. R. Mayer, E. B. Sabino, H. D. C. Fals, A. G. M. Pukasiewicz,
W. R. de Oliveira, S. Björklund, S. Joshi

Applications – Aviation Industry

Deposition and Characterization of Thermally Sprayed Metallic Coatings onto Polymer Reinforced Carbon Fiber Composites	643
---------------------------------------------------------------------------------------------------------------------------------	-----

D. S. Ghuman, M.-L. Cliche, B. C. N. M. de Castilho, F. B. Ettouil, C. Moreau, C. Pan, P. Stoyanov

Applications – Electronics and Sensors

Fluid Velocity Sensors Made by Thermal Spray	652
----------------------------------------------------	-----

A. Hanna, S. Chandra

Applications – Medical Industry

Mold-resistant air filters embedded with copper particles	660
-----------------------------------------------------------------	-----

L. Pershin, S. Delage, M. Zhang, M. Ringuette, J. Mostaghimi

Antibacterial surface coatings by Plasma Spray (APS/SPS) and Physical Vapor Deposition (PVD) processes: a comparative approach	663
-----------------------------------------------------------------------------------------------------------------------------------------	-----

L. Youssef, A. Prorot, L. Gnodé, T. Maerten, S. Belvèze, C. Acikgoz, N. Manninen, V. Rat, A. Vardelle, A. Denoirjean

Applications – Power Generation

Improvements in cavitation and slurry wear erosion of Inconel 718 laser cladding through the NiNb addition	670
---------------------------------------------------------------------------------------------------------------------	-----

H. D. C. Fals, S. R.F. Sabino, A. G.M. Pukasiewicz

Equipment/Consumables – Industrial Automation & Robotics

Visual Odometry for Mobile Material Deposition Systems using RGB-D Cameras	681
-------------------------------------------------------------------------------------	-----

H. Saadati Nezhad, M. Contreras, A. McDonald, E. Hashemi

Equipment/Consumables – Process Diagnostics, Sensors & Controls

Understanding the impact of binary plasma gas mixtures in plasma spraying	689
---------------------------------------------------------------------------------	-----

K. Bobzin, H. Heinemann, M. Erck, K. Jasutyn

Properties and Materials – Metal Coatings

Effect of the Test Method on the Resulting Adhesion of the Coating	696
--------------------------------------------------------------------------	-----

Ž. Dlouhá

Properties and Materials – Tribological Coatings

Design and Development of Cost-Effective Equipment for Tribological Evaluation of Thermally Sprayed Abradable Coatings 704

K. Bertuol, F. R. E. Rivadeneira, B. C. N. M. Castilho, C. Moreau, P. Stoyanov

Thermal Spray and other Processes – Additive Manufacturing

Investigation of Mechanical Properties of Cobalt Chromium Additively Manufactured Using Direct Energy Deposition: Experimental Study and Finite Element Analysis 712

D. Smith, P. Pickett, T. Grabowski, J. Thorpe, F. Azarni

Thermal Spray and other Processes – Cold Gas Spraying

Heat treatment effects on structural and mechanical features of cold sprayed 3D Aluminium part 724

M. Sokore, S. Deng, H. Liao, R. N. Raelison

Cold-Sprayed Aluminum Alloys: Exploring the Differences Between 6061 and 7075 732

K. Rafiee, E. Barbosa de Melo, P. Vo, M.H. Martin, S. Yue

Thermal Spray and other Processes – Modeling & Simulation

Investigation of the pore formation during the cold spray additive manufacturing of a bulk aluminum part 743

M. Sokore, S. Deng, H. Liao, R. N. Raelison

Nozzle geometry optimization for cold spray applications by using 3D-CFD calculations 751

J. Gutiérrez de Frutos, A. List, F. Gärtner, T. Klassen

Thermal Spray and other Processes – Plasma Spraying

Influence of Concentrated Solar Power on Plasma Sprayed Hybrid Thermal Barrier Coatings 759

J. Dudik, I. Hulka, T. Tesar, F. Lukac, R. Musalek

Thermal Spray and other Processes – Pre- & Post-Treatment

Lightblast 768

T. Wanski, P. Herwig, J. Hauptmann

Authors and Co-Authors 773
