

Table of contents

Preface

Proceedings

Welcome & Opening Session

Roadmap for a more sustainable aluminium alloy portfolio to produce brazed heat exchangers	1
--	---

A. Smeyers, B. Jacoby, F. Ritz

The Role of Surfaces in Aluminium Brazing	2
---	---

M. Türpe, D. Hawksworth

Equipment and Quality Control

Evolution of Modern Aluminium Brazing Practices	8
---	---

D. Hawksworth

Advancements in Vacuum Aluminum Brazing Furnaces for modern EVs Thermal Management Systems	11
--	----

G. Valsecchi

Challenges and Benefits of Temperature Profiling in the Aluminium Brazing Industry	14
---	----

M. Taake, B. Sulinski, B. White

Materials I

A novel recycling-friendly core alloy solution for vacuum brazing	15
---	----

P. Morak, G. Hanko, M. Hafner, S. Hainthaler

Application of Low Carbon Technology in Advanced Multilayer Aluminum Alloy	20
--	----

L. Cao

Recycled Content of Aluminium Materials: New Evaluation Methodology with Refined Classification of Scrap	21
--	----

T. Suzuki, I. Daigo

Research and Developments

Impact of Flux Residues in Heat Transfer Systems for Battery Electric Vehicles and Possible Solutions	27
---	----

T. Weide, R. Gonzáles

Experimental Study of Refrigerant Flow Boiling Heat Transfer and Pressure Drop in Flat Aluminum Tubes for Heat Exchanger Applications	30
---	----

H. Zhao, X. Li, S. Elbel

Cesium-free CAB flux with improved magnesium tolerance	35
--	----

A. Rehmer, S. Gutmann

Applications

CAB or VAB? Competition or Complement?	45
--	----

A. Bielewicz*, Ł. Chwiałkowski

Considerations on Flux-free Brazing of Aluminum	50
---	----

M. Türpe, B. Grünenwald

Fluxless Soldering of Aluminium components at temperatures lower than 450 °C using ultrasonics and active gas atmospheres	51
---	----

J. Kolberg, I. Rass, T. Kolberg

Flux-free brazing of aluminum alloys and evaluation of brazing strength	57
---	----

A. Kato, Y. Miyazawa

Materials II

High-Strength 6xxx alloy for battery cooling plates	62
---	----

P. Morak, G. Hanko, R. Morak, S. Hainthaler

High performance, brazeable AL-Mg-Si-(X) battery cooling plate development	67
--	----

Y. Han, C. Nie, J. Tang; Y. Kinoshita, Y. Gao, G. Chen

Alloy for multi-port extruded tube compatible with high strength after brazing and excellent extrudability	70
--	----

R. Tomori, T. Suzuki, N. Yamashita

Investigation of Strain Induced Liquid Film Migration (SILFM) and Corrosion Mechanism of Multi-Layer Brazing Aluminum Sheets	75
--	----

Y. Tu, F. Liu, Q. Zhang, Z. Yuan, T. Yuan

Alternative Processes

Alternative manufacturing options for battery cold plates for electric cars 76
O. Quirin

Combined Forming and Brazing Process for Cooling Plate Production 82
T. Düpmeier, E. Grussmann

Key to safe processes: Brazing of Aluminium and its mixed joints with Penetration
Depth Induction and cored brazing filler rings 86
T. Vauderwange, Á. Cypriano

Potentials of low-melting Al-based filler metals for brazing high-strength aluminum
alloys..... 94
V. Fedorov, S. Weiss, T. Uhlig

List of authors 99
