

# Table of contents

## Preface

### Surface Treatment / Materials

C. Punshon, A. Ferhati, Cambridge/UK, M. Dear and A. Field, Halesowen/UK Dissimilar metal joining for pressure plant and forge tools .....	1
M. Okubo and T. Hasegawa, Chiba/JP Electron beam welding of cast iron and cast steel .....	7
S. Valkov, P. Petrov, D. Dechev, N. Ivanov and R. Bezdushnyi, Sofia/BG Study formation of aluminides in Al-Ti-X (X = Zr, Hf) systems induced by electron-beam surface treatment .....	16
P. Hengst, Freiberg/DE, R. Zenker, Freiberg/DE and Mitweida/DE, T. Süß and K. Hoffmann, Chemnitz/DE Electron beam profiling and electron beam remelt-bonding for improving the load-bearing capacity of thermal spray coatings .....	19

### Applications

A. Senger, S. Ufer, S. Olschok and U. Reisgen, Aachen/DE Extension of the material and processing spectrum in wind energy plant through consistent component safety certificates and welding process optimization .....	27
H. Kendziora, Langenselbold/DE The diversity of job shop by assistance of the electron beam .....	34
M. Mücke, M. Merkel, Hünstetten-Kesselbach/DE, C. Otten, Aachen/DE, M. Escher, Hünstetten-Kesselbach/DE, M. Paul, T. Flohr, K. Wrobel, Leipzig/DE, U. Reisgen and I. Balz, Aachen/DE Advances in micro electron beam welding .....	41

### Innovations I

A. N. Black, Enfield/US Electron beam welding of additively manufactured parts .....	46
L. Halbauer, P. Proksch, A. Buchwalder, Freiberg/DE, and R. Zenker, Freiberg/DE and Mittweida/DE Using scanning electron beam technology in hard soldering TWIP-matrix composites .....	52

## **Innovations II**

C. N. Ribton, S. del Pozo, D. R. Smith and W. Balachandran, Cambridge/UK	
Design of a plasma cathode electron gun using evolutionary optimization .....	58
N. Murray, G. Klimov, A. Beniyash and T. Hassel, Garbsen/DE	
Non-vacuum electron beam technology as a universal tool for material processing .....	65
U. Reisgen, S. Olschok and S. Gach, Aachen/DE	
Residual stress reduction by low-transformation-temperature (LTT) filler materials in electron beam welding .....	72

## **Process Diagnostics / Simulation**

S. Hellberg, Kassel/DE, S. Ufer, Aachen/DE, S. Böhm, Kassel/DE, and U. Reisgen, Aachen/DE	
Influence of fluctuating cathode characteristics on beam quality and welding results in electron beam welding .....	78
P. Oving, Metz-Tessy/FR	
Development of a new electron beam probing device and analyses method to ensure the weld quality in time .....	84
U. Reisgen, S. Olschok, S. Ufer, Aachen/DE, T. Graf and P. Berger, Stuttgart/DE	
Observing weld pool dynamics of the vapour capillary by using the real-time polarization intensity quotient goniometry .....	91

## **Additive Manufacturing I**

G. Klimov, N. Murray, A. Beniyash, Garbsen/DE, A. A. Bataev, O. G. Lenivtseva, Novosibirsk/RU, and T. Hassel, Garbsen/DE	
Additive manufacturing using non-vacuum electron beam technology .....	99
S. Janson, B. Loitlesberger, J. Weirather and M. F. Zaeh, München/DE	
Improvement of electric charge transportation in metal powders for increased process stability in electron beam melting .....	104
B. Baufeld, R. Widdison and T. Dutilleu, Rotherham/UK	
Electron beam additive manufacturing: Deposition strategies and properties .....	114

## **Additive Manufacturing II**

N. Bagshaw, A. Buxton, T. P. Mitchell, V. Jefimovs and M. E. Nunn, TWI Limited, Cambridge/UK	
Electron beam wire-fed additive manufacture and distortion control .....	118
B. Klöden, A. Kirchner, T. Weißgärber, B. Kieback, M. Süß, C. Schöne and R. Stelzer, Dresden/DE	
Additive manufacturing by electron beam melting – from powder to component .....	131

<b>List of authors and co-authors</b> .....	137
