## **Welcome to the 6rd International Congress on Aluminium Heat Exchanger Technologies for HVAC&R**

The 6th International Congress on Aluminium Heat Exchanger Technologies for HVAC&R is hosted in Düsseldorf, Germany, from 7 to 8 May 2019. We are looking forward to meeting participants from all over the world gathered here to exchange information about current processes and innovation in this industrial sector.

Not only with regard to the climate change it is becoming more important to use energy efficiently and reduce emissions. Stringent environmental requirements are the greatest challenges the heating, ventilation, air conditioning and refrigeration industry faces. This international congress is dedicated to these aspects and will be organised for the fourth time by DVS – German Welding Society.

DVS is proud to support this congress, which is in fact one of the best ways to transfer knowledge in different directions. Joining and brazing are complex technologies, applications of those technologies must be based on continuous activities in research, development, guidelines, rules, standards and training – the DVS concept of joining and brazing combines all those activities, thus we are ready to contribute to the further success of this congress.

We deeply thank all authors and session chairs for their valuable contributions to the congress and we welcome all participants!

A handwritten signature in black ink, reading "Roland Boecking". The signature is written in a cursive style with a long, sweeping underline that extends to the right.

Dr.-Ing. Roland Boecking  
General Manager of DVS  
German Welding Society

# Table of contents

Preface

## HVAC&R and HX products

R. Beckert, C. Becker, and J. Maier, Singen/DE

High Performance Heat Exchanger Tube Production Methods - Miniaturizing of MPE Profiles . 1

J. Rudolph, Seelze/DE

Alternatives to traditional PaintFlux solutions – Aluminium Brazing PaintFlux Toolbox ..... 5

G. Hayase, Suwon/KR

Development of Micro Channel Heat Exchanger for Residential Air-Conditioners ..... 11

## Research and Development

A. A. Shirzadi, Cambridge/UK; Donguan/CN

Ultra-High Pressure Laminated Aluminium Heat Exchangers for Jet Engines ..... 16

C. Martín-Callizo, T. Stenqvist, and S. Koscielski, Finspång/SE

TRILLIUM® Technology - an enabler for efficient aluminium HEX ..... 19

## Corrosion

B. Morton, and S. Roberts, Bloomington/US

New Coating Technology to Increase Corrosion Resistance of MPE Brazed Heat Exchangers 25

**List of authors** ..... 29
