Editorial profile, circulation and distribution analysis

Editorial Profile:

Technical-scientific trade journal for welding, cutting and brazing/soldering technology, including the large number of peripheral fields. Editorial subjects: research and development, training, further education, exchange of experience, welding, cutting, brazing/soldering, adhesive bonding and allied processes, material-related questions (ferrous and non-ferrous metals, plastics as well as base and fi ller materials), calculation, design and fabrication in structural steel engineering, tank construction, apparatus engineering, vehicle manufacture and mechanical engineering, welding machines including robots and controllers, material testing (destructive and non-destructive) as well as safety at work and health protection.

Organ: Official organ of DVS – German Welding Society

Recipient structure analysis

Sectors/branches of the economy/specialist fields/occupational groups

SCHWEISSEN und SCHNEIDEN reports on the results of development and research papers from all fields of industry as well as from industry-free institutes. Furthermore, the journal provides information about experience with regard to the application of welding technology in practice - in structural steel engineering, building and bridge construction, mechanical engineering, electrotechnology, vehicle manufacture, aircraft manufacture, reactor construction as well as the chemical industry. This information is supplemented by topical reports on new developments as well as on economic questions

Banner advertising

DVS Media GmbH has greatly expanded its website and online offering and completely revised its design

Why advertise online?

Banner advertisements increase awareness and promote image building. Use inexpensive online advertising where your target group is looking! The Internet has now become the leading medium for obtaining business information. According to the latest studies, more than 70% of decision-makers first get information online. (Online media disseminate information faster than traditional advertising media and usually reach a significantly larger readership.)

Your advantage!

Via the various websites you can reach specialists and executives from welding, cutting and soldering technology, steel construction, structural engineering and bridge construction, mechanical engineering, in electrical engineering, in vehicle construction, aircraft construction and in the chemical industry.

The Banners

Our offer includes 5 different banner formats (static / animated). With multiple occupancy of the banner spaces, the banners appear in rotation. We also offer you interesting placement options, perfectly tailored to your needs:
